SECRET

SUMMARY OF CONTENTS

Revised Schematic Sketch of the USSR Railroad Network

This sketch is a revision of FDB Translation Number 14/49, published 18 Feb 1949, entitled "Schematic Sketch of the USSR Railroad Network". The new sketch has been considerably enlarged making possible the addition of a great number of station names, particularly at the junction points of the various railroad systems.

The extent of the systems has been revised in accordance with the Official/Soviet Passenger Timetable of summer 1949.

Numbers appearing on the sketch refer to the appended Key to Railroad Systems. Those numbers, originally assigned to the various systems by the researchers, have not been changed. Systems created after 1940 have been added on at the bottom of the list.
